

How to run for Mac?

1. For daily news...

If folder is in a folder called project in documents.

Open Terminal

Type: cd documents/project

Hit enter

Type: source venv/bin/activate

Hit Enter

Type: python tabular_news.py

Hit enter

Program will ask for today's date. Do the following with the single quotes

Type: 'dd mon'

Where dd is the date and mon is the first three letters of the month eg. '29 jul'

Hit Enter

2. For news in excel (around 1 month of news)

If folder is in a folder called project in documents.

Open Terminal

Type: cd documents/project

Hit enter

Type: source venv/bin/activate

Hit Enter

Type: python excel_news.py

Hit enter
