How to run for Windows?

1. **For daily news…**

   Open command prompt

   If folder is in a folder called project in documents.

   Type: cd documents/project
   Hit enter

   Type: env\Scripts\activate.bat
   Hit Enter

   Type: python tabular_news.py
   Hit enter

   Program will ask for today's date. Do the following with the **single quotes**

   Type: 'dd Mon'
   Where dd is the date and Mon is the first three letters of the month (with first letter as capital) eg. '29 Jul'
   Hit Enter

2. **For news in excel (around 1 month of news)**

   If folder is in a folder called project in documents.

   Open Terminal

   Type: cd documents/project
   Hit enter

   Type: env\Scripts\activate.bat
   Hit Enter

   Type: python excel_news.py
   Hit enter
